[illegible]

The timeline illustrates the progression of COVID-19 cases and deaths from March 2020 to March 2021. It features a horizontal axis with dates and a vertical axis with case counts. The timeline is divided into three main sections: 'Early 2020', 'Mid 2020', and 'Late 2020'. The 'Early 2020' section shows a sharp increase in cases, peaking in April 2020. The 'Mid 2020' section shows a period of relative stability with low case counts. The 'Late 2020' section shows a significant resurgence in cases, peaking in November 2020. The timeline also includes a section for 'Deaths' in the bottom right corner, showing a steady increase in deaths over time.
